

Abstract of

magnetic assembly structure including a first lead frame and a second lead frame, the first lead frame being connected on a first lead frame and the second lead frame being connected to a second terminal having an anticorrosion layer. The first lead frame is to be connected on a second lead frame. The first lead frame is separated at a connection portion, the first lead frame is insulated from the yoke, a base for the first lead frame is a part between the yoke and the first lead frame, the first lead frame to be separated is incorporated into the yoke, and the first lead frame is arranged above the yoke.
